Full-stack software engineer specializing in AI-integrated web and mobile applications — architecting production-grade systems end-to-end, from database design and secure REST APIs to responsive frontends and cross-platform apps.

EDUCATION

University of Agriculture Faisalabad (UAF)

Faisalabad, Pakistan

Bachelor of Science in Computer Science (BS CS) — 6th Semester

Sept 2023 — Present

- Registration No: 2023-AG-9632
- Core Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Relational Database Management Systems (RDBMS & SQL), Operating Systems, Software Engineering, Web Systems
- Academic Focus: Algorithmic Time/Space Complexity (Big-O Analysis) and System Architecture fundamentals, balanced alongside family business responsibilities

EMPLOYMENT

Software Engineer — Full-Stack & AI Systems

2023 — Present

Independent / Open-Source Engineering

- Architected and shipped production-grade Python backend services (Django, DRF, FastAPI) applying OOP design patterns and modular software principles for clean, maintainable codebases.
- Designed optimized SQL schemas, normalization models, and indexing strategies to minimize API response latency and eliminate redundant database round-trips.
- Engineered secure authentication systems using stateless JWT tokens with auto-rotation/blacklisting and Google OAuth 2.0 Single Sign-On (SSO).
- Built responsive, production-deployed frontends in React.js (Vite, Tailwind CSS, CSS Modules) and cross-platform mobile apps in React Native (Expo), shipping to Vercel and Railway.
- Core technical toolkit: Data Structures, Algorithmic Analysis (Big-O), OOP, SQL Databases, Python, Django, DRF, FastAPI, React.js, React Native, Vite, Tailwind CSS, JWT, Google OAuth 2.0, Supabase, Firebase, Vercel, Railway, Git, GitHub.

SOFTWARE PROJECTS

Shifaa — AI-Powered Hospital Management System — Live: al-shifaa-hms.vercel.app

- Architected a multi-role hospital management platform with an AI voice receptionist ("Sana") for natural, voice-based appointment booking, serving Admin, Doctor, Patient, Nurse, Receptionist, and Pharmacist roles.
- Integrated Groq API (Mistral-7B) for conversational AI, Whisper for real-time speech-to-text, and Coqui TTS for natural voice responses.
- Engineered JWT-secured authentication, a feature-sliced React frontend architecture, and a normalized Supabase (PostgreSQL) schema for scalable data access.
- Utilized: Django REST Framework, React 18, Vite, Tailwind CSS, Supabase (PostgreSQL), Groq API, Whisper STT, Coqui TTS, JWT, Git, GitHub

AioVerse — Cross-Platform Productivity App (In Progress)

- Engineering an Android/iOS productivity suite bundling image tools, PDF tools, a QR code generator, and AI text tools (humanizer, translator, plagiarism checker) with English/Urdu support for the Pakistani market.
- Building the app in React Native (Expo), including custom SVG branding assets and native splash screen configuration.
- Authored complete BRS/SRS documentation to formalize requirements and system scope.
- Utilized: React Native, Expo, JavaScript, AI APIs, Git, GitHub

Bhutta Scents Storefront — Live: bhuttascents.com

- Built a custom e-commerce web storefront for a luxury fragrance brand featuring dynamic product catalogs and responsive shopping cart management.
- Engineered custom responsive grid layouts and fluid UI micro-interactions without relying on heavy third-party UI libraries.
- Utilized: React.js, Vite, Tailwind CSS, Vanilla CSS Modules, JavaScript, Git, GitHub

Hotel Management System (In Progress)

- Architecting a full-stack hotel management platform across an 8-milestone development plan, covering bookings, rooms, and staff operations.
- Utilized: Django REST Framework, React, TypeScript, Tailwind CSS, shadcn/ui, Git, GitHub

Rescue Project — Missing Person Search & Coordination System — Live: rescue-project.vercel.app

- Engineered a search-and-rescue web console for missing person registrations and volunteer squad coordination as part of a team project.
- Applied difference hashing algorithms for image comparison and configured secure JWT-based authentication workflows.
- Utilized: Data Structures, Algorithms, Python, FastAPI, Django, React.js, SQL, JWT, Git, GitHub

Additional Projects: Face Recognition Attendance System (Python), Quran Assistant (Django + SQLite + OpenAI), Food Delivery App (React + Firebase), Pharmacy Management System (C# WinForms + MS Access), Grocery Store Website (Flask + SQLite), LAN Chat App (Python GUI)

SKILLS

CS Fundamentals: Data Structures & Algorithms, OOP, Big-O Complexity Analysis, RDBMS, Operating Systems, Software Engineering Principles

Languages: Python, JavaScript/TypeScript, SQL (Familiar: C++, Java)

Frameworks & Web: Django, DRF, FastAPI, React.js, React Native (Expo), Vite, Tailwind CSS, CSS Modules

Databases & Cloud: PostgreSQL, SQL, Supabase, Firebase, Vercel, Railway

AI & Voice: Groq API, Whisper STT, Coqui TTS, OpenAI API, Prompt Engineering

Security & Tools: JWT Authentication, Google OAuth 2.0, Git, GitHub
